for the first day showed a marked increase over the enrollment of a year ago. The school census for the schoilastic year 1902-3 showed an enrollment of 11,300 pupils in the schools and the different grades. The enrollment yesterday, as reported to City Superintendent of Schools D. H. Christensen, showed an enrollment of 11,534. That is an increase of 234 so far this year over 192-3.

The increase will be greater than that, however, for the strength of the schools is never shown upon the first or second day, for new pupils continue to enroll for about a week after the schools open. The attendance this year should, it is argued, be about 400 or 500 greater than last year. Upon that ratio in Salt Lake City, it is figured that the school population throughout the state should be about 1,000 greater than it was in 1902-3.

ALWAYS TIRED You Can't Change

To be tired out from hard work or bodily exercise is natural and rest is the remedy, but & there is an exhaustion without physical exertion and a tired, never-rested feeling-a weariness without work that is unnatural and shows some serious disorder is threatening the health. One of the chief causes of

vousness,

that "Always-tired, never-rested condition" is impure blood and bad circulation. Unless the body is nourished with rich, pure blood there is lack of nervous force, the musrervous force, the muscles become weak, the digestion impaired, and general disorder occurs throughout the system. Debility, insomnia, nervousness, indigestion

dyspepsia, loss of appetite, strength and energy, and the hundreds of little ailments we often have are due directly to a bad condition of the blood and circulation, and the quickest way to get rid of them is by purifying and building up the blood, and for this purpose no remedy equals S.
